

NCAA Eligibility

To play sports in NCAA Division I or II, a student must graduate from high school and successfully complete a core curriculum of at least 16 (Division I) or 16 (Division II) courses. Eighth grade middle school credit-bearing courses can be used to satisfy core-course requirements. (See page for NCAA Eligibility Requirements.)

Must not have been enrolled in middle school for a period of more than six consecutive semesters, beginning with the semester in which he/she was enrolled for the first time in the sixth grade. The six consecutive semester shall be counted continuously from that point, regardless of whether or not he/she remains continuously enrolled.
