

MA 3220 : Algebra I Honors

Algebra I Honors is a mathematics course for students who exhibit high mathematical ability and achievement. The course is designed to prepare students for Scientific, Technology, Engineering and Mathematics (STEM) fields. The course focuses on the development of problem-solving skills and the acquisition of mathematical vocabulary and symbols. Facility in the use of technology will not be a substitute for students' understanding of quantitative concepts and proficiency in computations. Students enrolled in this course will take the Algebra I End-of-Course test. Students cannot receive credit for both Algebra I Honors (MA3220) and Algebra I (MA3130).

Subject Area

Mathematics

Level

Middle School

High School

Grades
